

Hair growth cream for facial and body hair

MICROGEN PASTAE

Type-1 OTC Drugs

MICROGEN PASTAE

MICROGEN PASTAE is an easily absorbed external application cream for hair growth which contains two kinds of testosterone (androgenic hormone) as its main ingredients, and it is effective in promoting growth of terminal hair in **any parts other than head hair, such as eyebrows, beard, chest hair, underarm hair, and body hair.**

Cannot be applied to head

Precautions

Do not do the followings

(Failure to follow these precautions could cause current symptoms to worsen or result in side-effects and accidents.)

- The following persons must not use this product
 - People who have history of allergy to the ingredients of this product
 - People who put out 5 mm of the product from the tube and rubbed into a thin part of the skin such as inner thighs before using, and have symptoms such as drug eruption, redness, itching, rash or swelling on the following day
 - People who have or are suspected to have androgen-dependent tumors (e.g. prostatic tumor and malignant mammary tumor)
 - Women who are pregnant, who may be pregnant, or who are breast-feeding
 - Children under 15 years of age
 - People who have prostate hypertrophy with dysuria
 - People with a prostate-specific antigen (PSA) more than 2.0 ng/mL as a result of prostate examination* (Follow your doctor's judgment)
 - ※Active ingredients of this product (methyltestosterone and testosterone propionate) may cause prostatic tumor to progress.
 - a) The incidence of prostate tumors increases especially for men older than 50 years, so it is necessary to have a prostate examination before using this product.
 - b) People who use it continuously are required to have a regular examination.
 - c) When abnormality is found in an examination, stop using the product immediately, and consult your doctor or pharmacist.
 - People with sleep apnea syndrome
 - People with alopecia areata
- Do not apply on the following parts of your body
 - Eyes, around the eyes, and mucosa (oral cavity, nasal cavity, etc.)
 - Head hair, eyelashes
 - Penile urethra (urethral meatus), mucosa of genital area
 - Parts with external wounds, inflammation, eczema, sores, and suppuration
- Do not use any medicine containing androgenic hormone while using this product.
- Avoid transferring this product to someone else.
 - Wash your hands thoroughly with soap and lukewarm water after applying.
 - Make sure not to transfer this product to others. If the product is transferred to others, wash immediately.
 - If the application site can be contacted with others, wash the site thoroughly with soap and lukewarm water

Consultation

- The following persons should consult a doctor or pharmacist before using this product
 - People who are under medical treatment
 - People who have prostate hypertrophy without dysuria
 - People who have history of allergy (eruption, redness, itching, rash, swelling, etc.) to any medicine or cosmetics
 - People who are allergic, or who have a family background of allergies
 - People who have or have history of severe heart, kidney, or liver disease or high blood pressure
- Stop using the product immediately and consult your doctor or pharmacist with this leaflet if you experience the following:

Continued overleaf

(1) If you experience the following symptoms after applying the product

Related parts	Symptoms
Skin (application site)	Eruption, redness, swelling, rash, itching, blisters, pimples

(2) If the symptoms persist after using the product for 1 to 3 months

(3) If you experience menstrual disorder or notice signs of virilising effects such as a change of voice

(4) If you used the product incorrectly

Effects

Hair follicle disease and hypotrichosis for both male and female

(Hair growth promotion and hair fostering for face, chest, limbs, armpit, and genital area)

Dosage and administration

Rub 0.1 g to 0.3 g of the product onto the desired site once or twice a day.

Detailed directions for use

Remove the cap and place the puncture top onto the seal to open.

Depending on the size of application site, apply the proper dose as follows:

- ◆ **For eyebrows**, apply about 0.1 g (size of a bean) once or twice a day.
Lightly rub onto eyebrows from the inner ends toward outer ends.
- ◆ For hairlessness or thinning **body hair** (pubic hair), apply 0.1 g to 0.3 g once or twice a day.
Be careful not to touch the mucous membrane part, and rub it onto the lower abdomen.
- ◆ **For beard and chest hair**, etc., rub on 0.1 g to 0.3 g depending on the size of application site.
- ◆ Be careful not to apply too much.

Precautions regarding dosage and administration

- (1) Strictly adhere to the prescribed dosage and administration.
- (2) Be careful not to let the product get into your eyes. If this happens, rinse off with water or lukewarm water. If symptoms are severe, consult an ophthalmologist.
- (3) Wash your hands and fingers thoroughly before and after applying.
- (4) Clean the application site before applying.
- (5) For external use only.
- (6) MICROGEN PASTAE has no immediate effect, and it is necessary to use continuously from 1 month to 2 to 3 months generally. However, as there are individual differences in effect, it is not recommended to continue using it if there is no reaction after using it for 1 to 2 months because you may not get the expected effect.
- (7) It may not be effective for elderly people (ages 65+).
- (8) This product does not have an effect on turning gray hair black.

Description
